FLOWING WELL NEAR MAMMOTH

Wills & Kellogg Have
Struck It Rich in an Ar-
tesian Supply at Depth
of 760 Feet in San Pedro
Valley

Messrs. Wills and Kellogg, who are ranching on a large scale near Mammoth in the San Pedro valley, have struck it rich, according to George Truman, and in a way that will bring rejoicing to their neighbors and friends. At the depth of 760 feet they encountered artesian water that now furnishes them a continuous flow of 500 gallons per minute. The water will be utilized for irrigation and general ranch purposes.

The many friends of these men who have had the pluck and energy to develop a valuable resource of that section will wish for them all the prosperity that can follow such a valuable acquisition to an Arizona ranch.

But what is of still greater importance is the demonstration of that valuable resource in the San Pedro valley, for there is no such thing as an exclusive right in an artesian water supply. There is more water underground for the energetic ranchers who go after it.

SPECIAL DISCOUNTS.

Now, on strictly new-line, come and get first choice. Arizona, Oakleaf Farm, corner 1st and Adams Sts. 11

Harris Merton Lyon, author of some of the most unusual stories of the last few years, eclipses himself for novelty in a story in the May Red Book Magazine. It is called, "Eye and the Walled-in Boy." It tells of a boy who grows from childhood to manhood with no companions other than children of four and a half to five years of age, and a deaf and dumb Scotch butler. Then a woman comes into his life, and the story presents the question, "Would it have been possible to keep the man clean throughout his life if no woman had come?"

A MOTHER PRAISES THE BOY SCOUT IDEA.

In the May Woman's Home Companion, a mother gives her personal experiences with her troublesome boy of twelve or fourteen years of age and tells how his connection with the Boy Scouts of America made a better boy of him. "The twelve points of the Scout law," says the mother, in her article, are:

1. A scout is trustworthy.
2. A scout is loyal.
3. A scout is helpful.
4. A scout is courteous.
5. A scout is kind.
6. A scout is obedient.
7. A scout is cheerful.
8. A scout is thrifty.
9. A scout is brave.
10. A scout is clean.
11. A scout is reverent.

After telling how her son entered the movement she goes on to say: "I had hoped my boy would be all these things, and had so admonished him. But these are scout laws, and you, not advice and admonitions, not hopes backed by maternal pleadings and fears, but laws, self-imposed when the scout takes his oath; for in taking the oath he promises to obey these laws. That settled it. If the scout movement stood for these things, and inspired and exacted them I was with it, heart and soul."

Upon the start the whole thing was a great success. The boy, for one, benefited immensely by the association. It would take me too long to tell you how much. I only tell you humbly that some of the faults in him which I had worked with for years, such as carelessness, selfishness, shiftlessness, occasional cowardice, and sometimes irreverence, began to disappear, and without fret or friction. A good scout had none of these faults; they are against the scout law. He was trying to be a good scout; that was all.

"Have you a boy of your own? If you have, I think you cannot do better than to look into the scout movement. He is sure to hear of it, and if he is anywhere near twelve, or thirteen, or fourteen, he is pretty sure to want to join it. I beg you, too, not to put anything in his way; and then, rather, I beg you to KEEP YOUR HANDS OFF. Your part is to listen when he talks to you about it; to approve; to have a good supper waiting for him when he comes back from his scout tramping; and to continue to say your prayers at night for him."

CONSOLIDATED IS IN DANGER OF BIG LOSS

Adverse Legislation May
Have Effect of Closing
Down Copper
Plant

EQUIPMENT IS
MOST COMPLETE

Power Plant Generates
Energy Equal to Twelve
Thousand Horse
Power

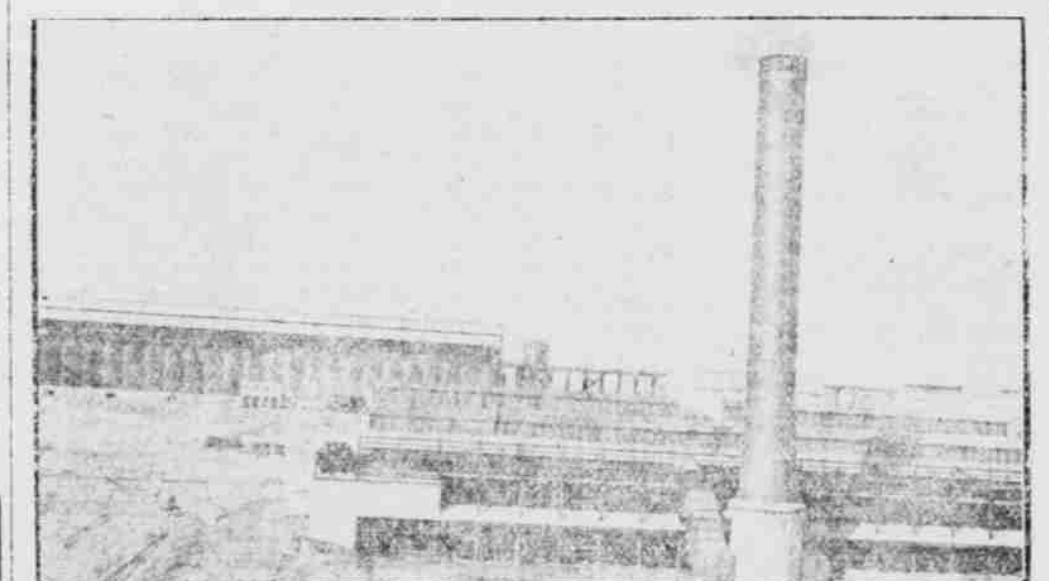

Everybody knows in a general way that the copper business of Arizona is an enormous business. Every body knows that it is the principal source of wealth in the state; that vast sums of money are invested in it, that it gives employment to num-

as a matter of course, are Mexicans. The effect of the Kinney bill, if it should become a law, according to a statement made the last week by one of the officers of the company, would be to cripple the plant to such an extent that it would have to close down. The appalling character of a disaster of that kind would be difficult to realize.

And it must be remembered that a property like that cannot close down one day and start the next and lose only in the matter of time. The pictures which accompany this article will give an idea of the mammoth proportions of this plant. Taking everything into consideration, the loss from every source, the idle machinery, the maintenance of expense without any income to balance it, and it is estimated by Superintendent Bradley, of the construction department, that to close the Ray mine for just five minutes would entail a loss of \$14,000 on the company. This astounding statement will give an idea of the immensity of the plant.

The general appearance of shaft No. 1 will give a faint idea of what this enormous plant is like. It is one of the most completely equipped of any of its kind in the country. Its benefits to the community—to Phoenix indirectly and either directly or indirectly to all of this part of the state, can hardly be overestimated.

Another of the illustrations shows the mill and power plant. This is located at Hayden and not far from shaft No. 1. The interior of the power plant is shown in the third illustration, where the most powerful and modern electrical machinery known to present-day science has been installed. It is difficult to imagine the disaster that would follow the des-

thousands of people; and that anything which strikes at the copper producing business strikes also at the prosperity of everybody in Arizona.

This matter has been discussed recently to some extent because of the introduction in the legislature of what is known as the Kinney bill, by which it is proposed to force all the non-English speaking persons in

struction of activity at this enormous plant.

It may be mentioned here that Mr. Bradley, the construction superintendent, is one of the most advanced men in this country in his line of work. He has had charge of construction on several large plants in Arizona and Utah. Superintendent MacDonald is in charge of the mine and is one of the influential men in

Ray Consolidated Copper Company Shaft No. 1, Ray, Arizona.

the mines and about the smelters out of employment. But it is doubtful if many realize just what the success of the bill would mean.

Take the mines of the Ray Consolidated Copper company for instance. This company's property, located at Ray, is one of the most richly developed in Arizona. It is a property that gives employment to hundreds of people, many of whom still in the city.

the affairs of the Consolidated. Both of these men, naturally, view with alarm the threat of the legislature to pass the bill introduced by the senator from Gila county.

Both Mr. Bradley and Mr. MacDonald were here for a few days at the end of the week and stopped at the Adams. Mr. MacDonald left Saturday morning but Mr. Bradley is thousands of people, many of whom still in the city.

COPYRIGHT ADLER-ROCHESTER

Two Thirds of Your Life is Spent in Your Clothes

—They're Mighty Important

At least we think that clothes are important—to the extent that we forego big profits to supply the best the market affords at prices the average man wants to pay.

This we are enabled to do because we handle the product of the finest tailoring institution in the world—an institution whose purchasing power permits of rare clothes value.

ADLER-ROCHESTER CLOTHES

You are doubtless familiar with this famous make. They are being worn today by the best-dressed men everywhere.

Surely you will want to at least see our Adler-Rochester stock—even if from curiosity. And we won't resent your inspection one bit—we invite comparison.
